

1. A method for downloading code to a resource  
constrained computer, the code being separable into at least  
one package having at least one referenceable item,  
comprising:  
forming the package;  
forming a mapping of the referenceable item to a  
corresponding token; and  
providing the package and the mapping.

2. A method for linking code downloaded to a resource  
constrained computer, the code being separable into at least  
one package having at least one referenceable item,  
comprising:  
receiving the package;  
receiving a mapping of the referenceable item to a  
corresponding token; and  
linking the package using the mapping.
